Key Strengths

- Demonstrated strong architectural tradeoffs matching Google standards for Machine Learning Engineer.
- Maintained confident, natural vocal cadence at 138.5 WPM without rushing.
- Handled interviewer follow-up questions with structured First-Principles reasoning.

Areas for Improvement

- Quantify business metrics more explicitly in the 'Result' phase of the STAR framework (e.g. latency % drops or cost savings).
- Slight reliance on filler phrase 'like' during complex concurrency explanation.

Actionable Coaching Recommendations

- Anchor behavioral answers with explicit metrics: \$ savings, latency ms, team size.
- Pause for 1 second before answering algorithmic edge cases to structure thoughts.
- Research Google-specific leadership principles and system architectures.
